

## Exercise Week # 5

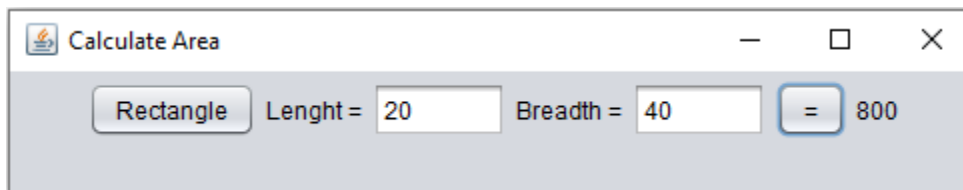

Inside the Exercises-Java2 project use the exercise Calculator2 provided in the Lesson 12

Copy the code and create a new file in the project with the name **W5Exercise1YourName** to calculate the Area of a Rectangle or a Triangle

Similar to the following picture:

The first button selects Rectangle or Triangle and change the Labels  
For a Rectangle

Select Length and Breadth and when click = button obtain the Area of the Rectangle as  $\text{Length} * \text{Breadth}$

For a Triangle

Select Base and Height and when click = button obtain the Area of the Triangle as  $(\text{Base} * \text{Height}) / 2$

Submit the **W5Exercise1YourName.java** and a screenshot of the result.

You can improve the windows using different Layout if you want.
